

Internet Programming

WYSIWYG Editors

Dan Brandon, Ph.D., PMP

WYSIWYG Uses

- Also called “visual” editors
- Small Companies
 - Build websites
 - Maintain websites
- Large Companies (for large companies, most HTML/JavaScript is written by server side programs)
 - Website design
 - Website prototypes

Common WYSIWYG Products

- Expression Web – SharePoint (was FrontPage before 2006)
- DreamWeaver (integrates with Cold Fusion & PHP)
- Komposer
- Office Studios
- WordPress

Easy Web Authoring!

KompoZer is a complete web authoring system that combines web file management and easy-to-use WYSIWYG web page editing.

KompoZer is designed to be extremely easy to use, making it ideal for non-technical computer users who want to create an attractive, professional-looking web site without needing to know HTML or web coding.

Microsoft Expression Web

The screenshot shows the Microsoft Expression Web 2 product page. The browser's address bar displays the URL: `http://www.microsoft.com/expression/products/overview.aspx?key=web`. The page features the Microsoft Expression logo at the top left and a search bar at the top right. A navigation menu includes links for Home, Product Information, Solutions, Try It, How To Buy, Partners, Technical Resources, and Community. Below this, a secondary navigation bar lists various Expression products: Expression Studio, Expression Web, Expression Blend, Expression Design, Expression Media, Expression Encoder, and Professional Subscription. The main content area highlights Microsoft Expression Web 2 as 'The professional web design tool' and promotes a 'New Era, New Tool' by combining it with Visual Studio 2008. To the left of the text is a 3D rendering of the Expression Web 2 software box, which includes a 'Play' button and the text 'See it in Action'. Below the main text are two buttons: 'Try Now' and 'Buy Now'. The page is divided into three columns at the bottom. The left column, titled 'Expression Web 2 Details', contains links for a Video Feature Tour, Features, What's New in Version 2?, Why Buy?, Privacy Statement, System Requirements, and FAQ. The middle column, titled 'Other Expression Products', lists Expression Studio 2, Expression Blend™ 2, Expression Design 2, and Expression Media 2, each with a small icon. The right column contains three promotional boxes: 'Buy a Subscription Now Available', 'Join the Expression Forums', and 'Expression Blend 2.5 Preview'. At the very bottom, there is a 'View Upgrade Eligibility' link. The browser's status bar at the bottom shows 'Done' on the left and 'Internet' and '100%' on the right.

Templates & Libraries

- Dreamweaver provides for the creation of “templates” which are basic page designs that are to be used in the creation of many pages in a site - Templates contain ‘editable’ and ‘non-editable’ regions
- Dreamweaver also provides for the definition of ‘library’ items which are sections of HTML code references (including images, applets, etc.) that are to be used in many web pages
- Both templates and library items can be converted to server side includes

Create “Templates”

Drawing

- SmartDraw
- Paint Shop Pro
- Macromedia FireWorks or Freehand
- Adobe Illustrator or Photoshop
- Corel Graphics Suite

Some products emphasize vector drawing, and some emphasize bitmapped manipulation.

Meet the Turbo Tails Tubes

Looking for a tube that has salt, garlic, and real ground-up crawfish in it that big fish won't let go? Then Turbo Tail Tubes are the ones for you. Available in 3" **Finesse** (1½" body & 1½" tails), 4" **Turbo Tails** (1¾" body & 2¼" tails) and 5" **Flippin' Tubes** (2¾" body & 2¼" tails). Only one of a few tubes made today that has the action and consistent body size that the Tournament Angler needs to stay competitive on the trail today.

And now, our tubes have twice the amount of salt added to them. This lets the tubes hold in the scent longer than before.

"Get Hooked-Up with Turbo Tail Tubes!"

New Colors:

Chocolate Blue, Dark Melon Halo Gold and Green Pumkin Red now available in the 4" Turbo Tails.

Scented with Salt, Garlic and 100% Real Crawfish.

Office Product Exports

- Microsoft Office and other office products can now export documents in HTML format:
 - Word
 - Publisher
 - Excel
 - PowerPoint
- However generated HTML is not nearly as good as done manually or with WYSIWYG editors

Using Microsoft Publisher

The screenshot shows a web browser window displaying an eHow article. The address bar shows the URL http://www.ehow.com/how_9027_create-web-page.html. The page has a navigation bar with links: HOME, HOW TOs, VIDEOS, WRITE, RESOURCES, COMMUNITY, and MY PROFILE. The article title is "How to Create a Web Page Using Microsoft Publisher" by eHow Computers Editor. It has a rating of 4.5 stars from 43 ratings. The article text describes using Microsoft Publisher to create web pages. A "From Quick Guide: Desktop Publishing" section includes a thumbnail and a link to "Create a Classroom Web Page". The article is part of a "2 of 7" series. On the left, there are "More Articles Like This" and an "Ads by Google" section for "Build Your Website in Minutes 30-DAY FREE trial". On the right, there are "Members Who Did This", "I Did This", "Desktop Publishing Ads", and a "CALORIE TRACKER LIVESTRONG.COM" advertisement. The bottom of the page shows "Instructions" (Step 1: Start Microsoft Publisher), "Things You'll Need" (Internet Access, Computers, Microsoft Publisher, Personal Web Site), and "Related Videos" and "Related Articles" links.

Building a Web Site in Publisher

Content Managers

- Called CMS (Content Management Systems)
- Provide pre-built templates for different kinds of pages
- For a web page, one first chooses a template, and then adds content (text, images, etc.) to the template
- Manages consistency for all pages in a web site

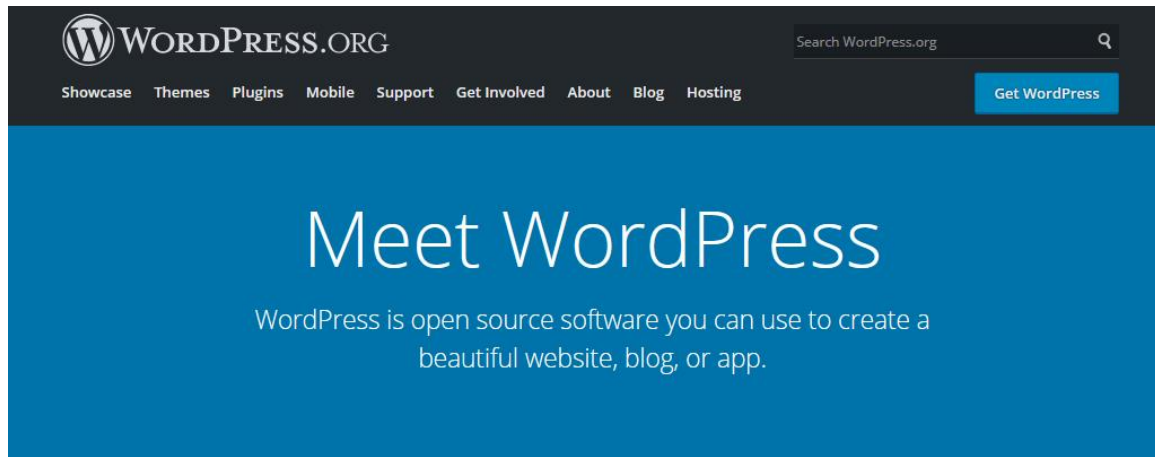

WordPress

- **WordPress (WordPress.org)** is a free and open-source content management system (CMS) based on PHP and MySQL
- Features include a plugin architecture and a template system
- Supports creation of blogs, most types of web content including more traditional mailing lists and forums, media galleries, and online stores
- Used by more than 60 million websites, including about 30% of the top 10 million websites

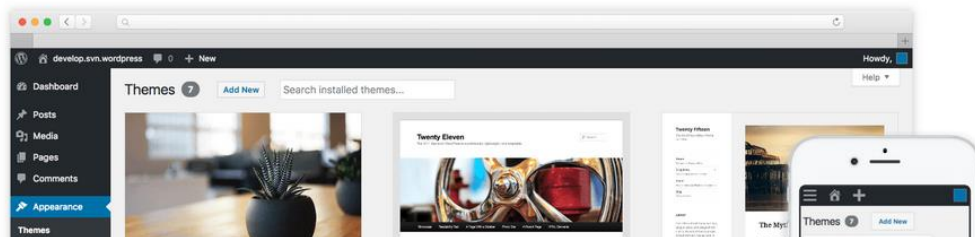

WordPress (con't)

- WordPress is the probably the most popular website management system in use
- WordPress was released on May 27, 2003, by its founders, Matt Mullenweg and Mike Little, and is released under the GPL license
- To function, WordPress has to be installed on a web server:
 - Either part of an Internet hosting service like WordPress.com or GoDaddy.com
 - Or a local computer may be used for single-user testing and learning purposes

WordPress (con't)

Beautiful designs, powerful features, and the freedom to build anything you want. WordPress is both free and priceless at the same time.

WordPress (con't)

Accessible

Extend WordPress with over 55,000 plugins to help your website meet your needs. Add an online store, galleries, mailing lists, forums, analytics, and [much more](#).

WordPress (con't)

- Due to their similar names, **WordPress.com** and **WordPress.org** are often confused for each other
- The main difference between the two is that WordPress.org is about the open source project for the creation of the WordPress software
- While WordPress.com provides freemium hosting using the WordPress software
- WordPress the software is able to be self hosted or hosted with assistance on any website or server, while **WordPress.com is simply one such provider for WordPress software hosting**

WordPress.com

- WordPress.com has several content stipulations due to how the platform works
- For example, content hosted on their service isn't able to be copyrighted with an [All Rights Reserved](#) license, otherwise content hosted on WordPress.com would not be able to be shown by the hoster
- Your advertising is also limited on WordPress.com (although they can post ads), whereas self hosted websites using WordPress from WordPress.org don't have such limitations
- The user interface on WordPress.com is greatly simplified from the one installed on one's own web server

WordPress.com (con't)

- WordPress.com allows anyone to sign up and build a free WordPress website (subdomain) that is hosted on their servers:
 - mywebsitename.wordpress.com
- Themes and plugins are limited, with some requiring specific hosting plans to be used on WordPress.com
- WordPress.com also provides many services which would otherwise require hand tuning, like hosting of WordPress, as well as security updates and server maintenance
- There are several “paid plans” that lift some of these restrictions

■ Website → Pages → Blocks

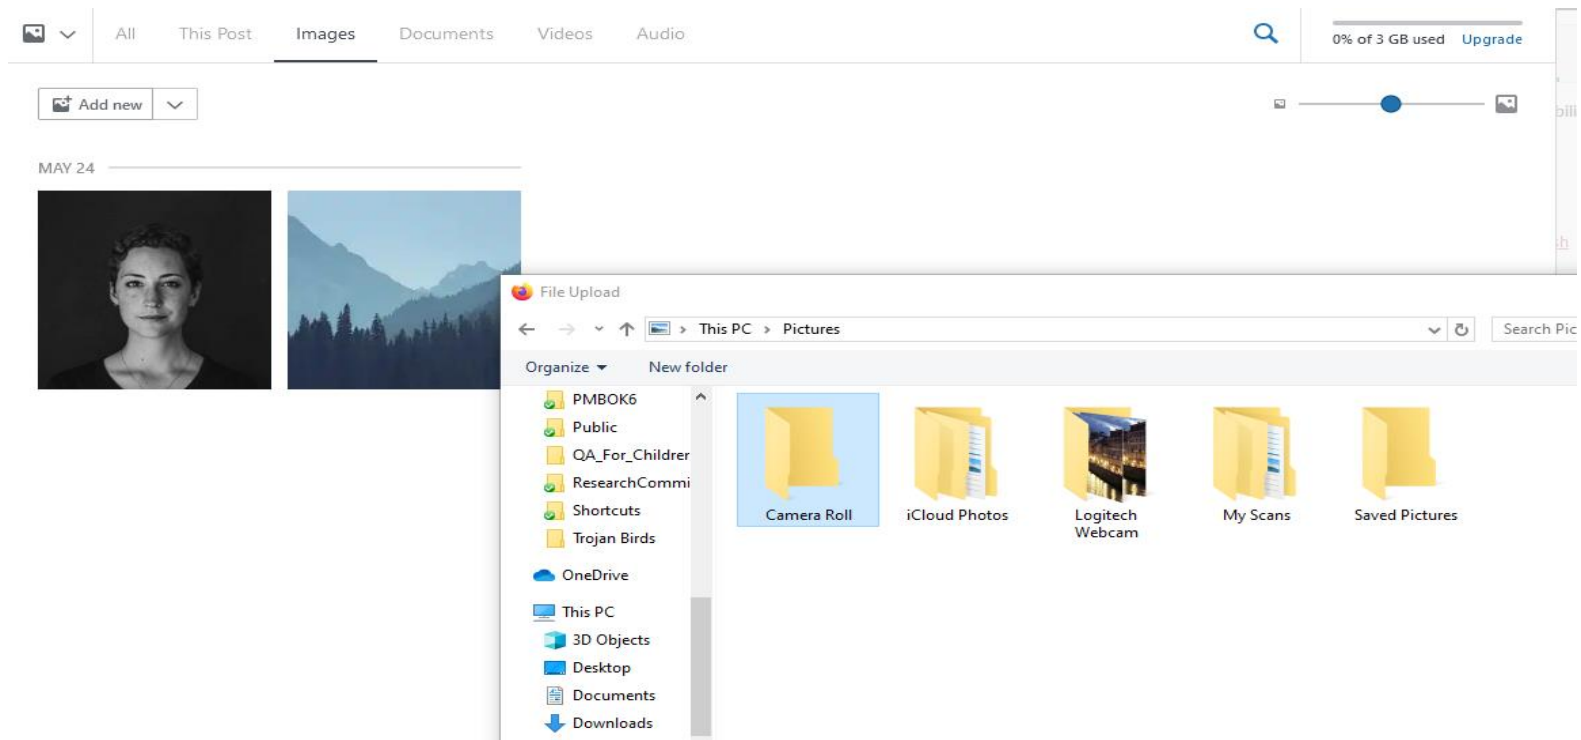

The screenshot displays the WordPress Gutenberg editor. At the top, there's a toolbar with icons for adding blocks, editing, undo, redo, help, and a menu. A 'Switch to draft' link is visible on the right. Below the toolbar, a statistics box shows: Words (40), Headings (2), Paragraphs (2), and Blocks (19). The 'Document Outline' panel on the left lists the page structure:

- Title: Home
- Cover: Layout Grid
- Column: H1: Welcome to Morris Training
(Your theme may already use a H1 for the post title)
- Group: Layout Grid
- Column: H4: Latest from the Blog
(Incorrect heading level)

The main preview area shows a page with a blue header, a large title 'Welcome to Morris Training', a subtitle 'Including Word, Excel, PowerPoint, Access, MySQL, PHP, Tableau, WordPress, etc.', and a blue 'Learn more' button. The background of the preview is a scenic image of a forest and mountains.

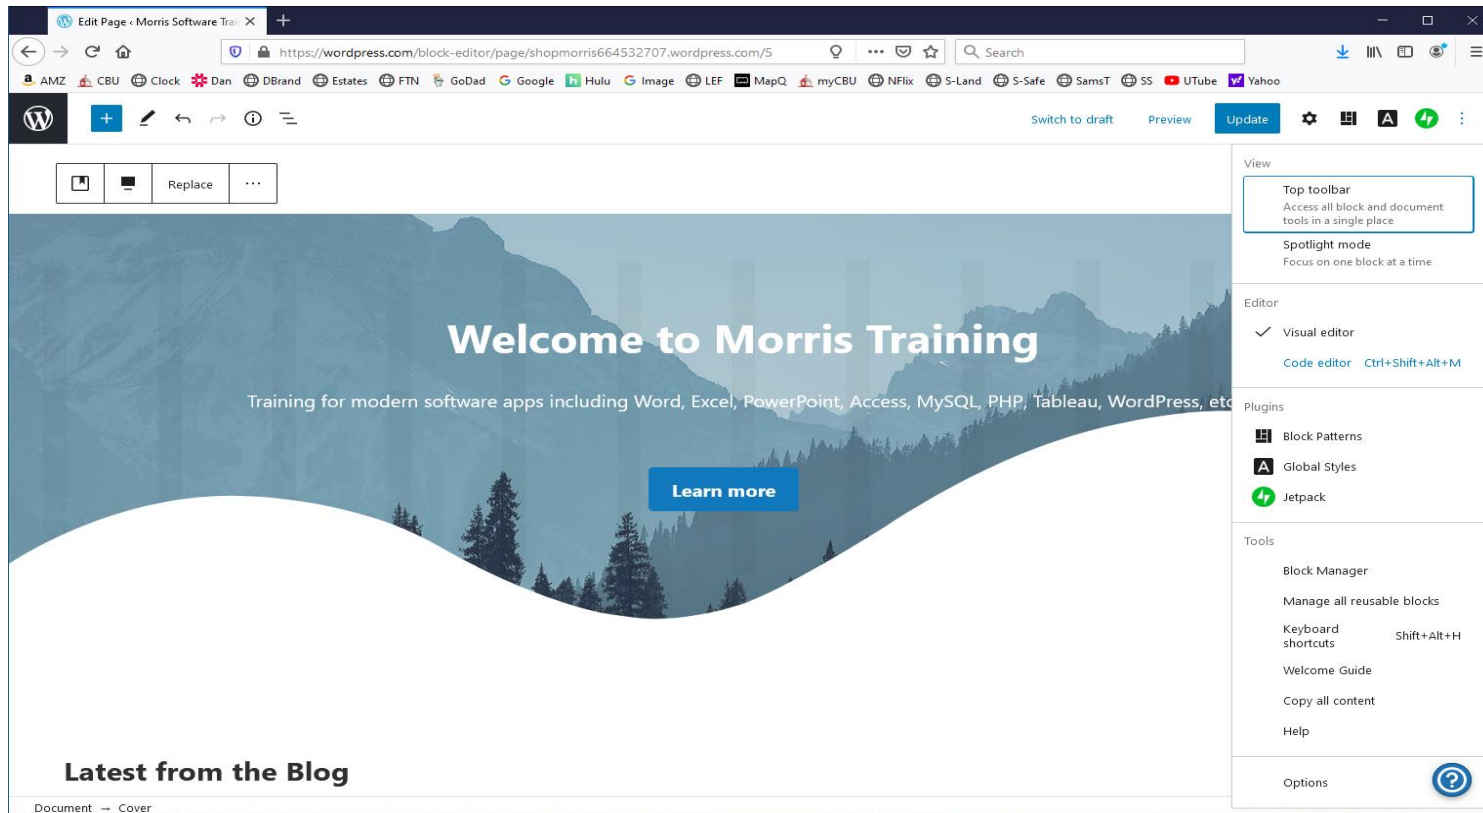

WordPress (con't)

Codeview:

The screenshot displays the WordPress Code Editor interface. The top bar includes the WordPress logo, a plus icon, and icons for undo, redo, and help. On the right, there are links for 'Switch to draft', 'Preview', and 'Update', along with icons for settings, a list, a text editor, and a help icon.

The main area is titled 'Editing code' and contains the following HTML code:

```
<!-- wp:cover {"url":"https://iamtakashinixtest20200131105336.files.wordpress.com/2020/01/q1-bin-w4hbafegiac-unsplash.jpg","id":26,"dimRatio":10,"align":"full","className":"is-style-bottom-wave"} -->
<div class="wp-block-cover alignfull has-background-dim-10 has-background-dim is-style-bottom-wave" style="background-image:url(https://iamtakashinixtest20200131105336.files.wordpress.com/2020/01/q1-bin-w4hbafegiac-unsplash.jpg)"><div class="wp-block-cover-container"><!-- wp:jetpack/layout-grid {"column1DesktopSpan":12,"column1TabletSpan":8,"column1MobileSpan":4,"column2DesktopSpan":6,"column2TabletSpan":4,"column2MobileSpan":4,""} -->
<div class="wp-block-jetpack-layout-grid alignfull column1-desktop-grid__span-12 column1-desktop-grid__row-1 column1-tablet-grid__span-8 column1-tablet-grid__row-1 column1-mobile-grid__span-4 column1-mobile-grid__row-1"><!-- wp:jetpack/layout-grid-column -->
<div class="wp-block-jetpack-layout-grid-column wp-block-jetpack-layout-grid__padding-none"><!-- wp:heading {"align":"center","level":1} -->
<h1 class="has-text-align-center">Welcome to Morris Training</h1>
<!-- /wp:heading -->

<!-- wp:paragraph {"align":"center"} -->
<p class="has-text-align-center">Training for modern software apps including Word, Excel, PowerPoint, Access, MySQL, PHP, Tableau, WordPr
etc.</p>
<!-- /wp:paragraph -->

<!-- wp:buttons {"align":"center"} -->
<div class="wp-block-buttons aligncenter"><!-- wp:button -->
<div class="wp-block-button"><a class="wp-block-button__link" href="http://learn.wordpress.com" title="learn.wordpress.com">Learn more</a>
<!-- /wp:button --></div>
<!-- /wp:buttons --></div>
<!-- /wp:jetpack/layout-grid-column --></div>
<!-- /wp:jetpack/layout-grid --></div></div>
<!-- /wp:cover -->

<!-- wp:group {"align":"full","backgroundColor":"background"} -->
<div class="wp-block-group alignfull has-background-background-color has-background"><div class="wp-block-group__inner-container"><!--
wp:jetpack/layout-grid {"column1DesktopSpan":12,"column1TabletSpan":8,"column1MobileSpan":4,"column2DesktopOffset":3,"className":"column1
grid__span-12 column1-desktop-grid__row-1 column1-tablet-grid__span-8 column1-tablet-grid__row-1 column1-mobile-grid__span-4 column1-mobi
grid__row-1"} -->
<div class="wp-block-jetpack-layout-grid alignfull column1-desktop-grid__span-12 column1-desktop-grid__row-1 column1-tablet-grid__span-8
```

The right sidebar contains a 'View' section with 'Top toolbar' (Access all block and document tools in a single place) and 'Spotlight mode' (Focus on one block at a time). Below this is the 'Editor' section with 'Visual editor' (Ctrl+Shift+Alt+M) and 'Code editor' (selected). The 'Plugins' section lists 'Block Patterns', 'Global Styles', and 'Jetpack'. The 'Tools' section lists 'Block Manager', 'Manage all reusable blocks', 'Keyboard shortcuts' (Shift+Alt+H), 'Welcome Guide', 'Copy all content', and 'Help'. At the bottom is the 'Options' section with a question mark icon.

Team Authoring

- For large web sites, a number of developers work together
- It is very important to coordinate the design and coding of all the developers
- Software is needed to provide for: **version control, “check-in/check-out”, document management, and work flow management**
- Some such products are: Adobe DesignTeam, Macromedia Sitespring, and Microsoft SharePoint
